Great assembly, Year 4! Thank you for sharing all your learning with us. You presented your assembly so clearly and we all learnt a lot!

We heard all about your Science learning including all of your learning about electricity; you explained the difference between electrical conductors and insulators; told us about how you made your own switches; and sang a fantastic song!

You also explained what you have learnt so far in your new RE topic which is all about Hinduism. You told us about Karma and Dharma, the Samsara cycle and Moksha.

We loved your super performance of a song all about the digestive system! You all know all about every stage of what happens to our food as it travels through the body.
