

Buckingham Palace

All of Key Stage 2 were lucky enough to visit Buckingham Palace this month. Whilst we were there, we took part in two activities. We did some landscape drawing on the Queen's lawn, where we learnt about perspective and how objects further away would appear much smaller in drawings, than those objects closer to the us.

We also had a self-guided tour of the palace, where we wore headsets and used an interactive guide that led us around important rooms in the palace. We found out some really interesting facts! September 2019

When asked how they found the trip, the feedback from one child was...

"It was beautiful!"

Another child said

"I loved the interactivity of the tour- particularly the 'find me' section, where we had to search for specific things in each room."
