

Careers day

June 2019

"Thank you Dean for showing us so much. It was great to see all the things your company advertises and we really enjoyed talking to you about what careers we are interested in for the future."

We were lucky enough to have almost thirty adults come into school to talk about their careers. It was a mixture of parents and relatives and professionals in the local area. There was a whole host of professions: an architect, a judge, a nurse, a psychiatrist and a designer, to name a few. All of us in Year 5 and 6 at Christ Church and Year 6 from Holy Trinity NW3 were able to speak to four of the adults during the morning. We also had the chance to ask the adults questions about their jobs, too.

"Thank you, Dan - we really enjoyed coming up with ideas and working together to create ideas for a new school building."

"Lisa was so interesting. It was great to hear about sustainable fashion as well as hear all about the design processes."
