

PSHE Week – February 2020
Keeping healthy and Safe

Safety in the home

During PSHE week we have been thinking how to keep safe and healthy. Reception and Year 1 were visited by two doctors from the NHS. They reminded us about who we should accept medicine from (GP, trusted adults and parents) and that an adult should always administer the amount you need to take. We learnt that medicine should be kept in a high place which is out of the reach of children. We learnt that we should never drink anything or take anything if we don't know what it is and that we should never take medicine without an adult there.

Year 1 and Reception also learnt about dangerous products that are used for cleaning. They can hurt our skin if we touch them so washing-up liquid and dishwasher tablets should be kept out of reach!

Year 1 made their own medicine cabinets with all different kinds of medicine safely locked away inside.

I've been learning how to keep myself

SAFE and **HEALTHY**
