

Tech Week: 2nd – 6th March 2020

Tech through the decades!

We were all very excited to find a classroom turned into an exhibition of computers and technology from the past fifty years. We were able to go on each computer and play games or have a go at creating our own programs. We were also able to sit in the first electric car and were absolutely fascinated by the variety of old telephones. Some of us could not figure out how to operate them! At the end of the day we enjoyed showing our parents all the old computers and programs we had seen and asking them about their memories of how technology has changed.
