## explained why they are desirable;

## wrote professional CVs to the employers sharing our skills and interest with the aim of persuading them to consider us;

### Why are you interested in this job?

I am interested in this job because:

- There is never a dull moment
- Other opportunities like seeing the world
- Ability to build meaningful relationships with the patient
- It's an honour to care for a patient

### What are three positive character traits you have? How will they help you in this new job?

Kind, honest and teamwork skills are my three positive character traits. These will help me by keeping the patients and my colleagues happy knowing the truth of the patient.

### When I grow up

When I am older want to be a doctor. Being a doctor is an amazing and skillful job. It's a matter between life and death and even taking the subjects like blood from the patient is a vital part of the experiment. Even though you have to study for years, I believe I can do and succeed thoroughly and I am cut out for this job.

Some people might believe that being that being in a surgery office is dismal but of course it isn't! My uncle is a doctor himself and he says that being in a study room by himself gives him time to think for himself.

So that's why I really want to be a doctor.

### When I grow up

Lets not lie to ourselves here. Everyone loves the sea. It's dark intensity and it's crystal clear, turquoise waters. That is why I want to be a Marine Biologist. It has to be one of the funnest and most intriguing jobs in the book. Even working in the lab is fun! You get to examine and discover different species and animals and you get to see the world. I understand that there is a lot of competition to be recruited as an apprentice and that you have to go to a good university and all, but I truly believe I am suited for this job. It has a certain ambience that draws me closer. You are rather well paid too. But instead of being stuck in a dreary, dismal surgeon's office, you are in some turquoise waters examining what could be a new species of water life.

## and got dressed up in our smartest outfit, role-played an interview and crossed our fingers that we would get our dream job!

### Where do you see yourself in 5 years from now?

In 5 years, I see myself studying for GCSE and applying for biology and chemistry and working as hard as I can to pursue my dream as a doctor.

### Do you have any questions about the job? How long will I need to work in a day?
