

School group – Week 8
Week beginning 1st June

Year 2 had to make kites so we all decided to make one! We had fun trying to fly them in the playground!

Year 2 worked hard to decide if things were alive, non-living/dead or never alive. They learnt about what makes something living.

Year 4 investigated pitch and sound by making their own instruments! They made drinking straw pan pipes and considered how they could change the pitch of the sound.
