

Reception

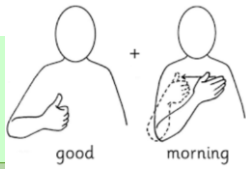

We thought about different feelings and how we can express our feelings to others. We really enjoyed making our own feelings necklaces!

We read the story of the Rainbow Fish, a fish who doesn't want to give away his most precious, sparkly scales. After talking to a wise octopus, who explains that sharing with others will help you feel happy and make friendships, he decides to share. As a class we thought about what things we would find difficult to give up! We also wrote friendship sentences on some rainbow fish!

thank you

We learnt what the word diverse means and spoke about how everyone is different. We thought about how different people say hello around the world and how people with hearing impairments communicate. We really enjoyed learning how to say thank you and good morning in sign language, we even learnt the signs to the song Five Little Ducks!

We celebrated difference by drawing pictures of our families and making some wonderful personalised hand-prints for homework.
