

# Reception's Design and Technology Project

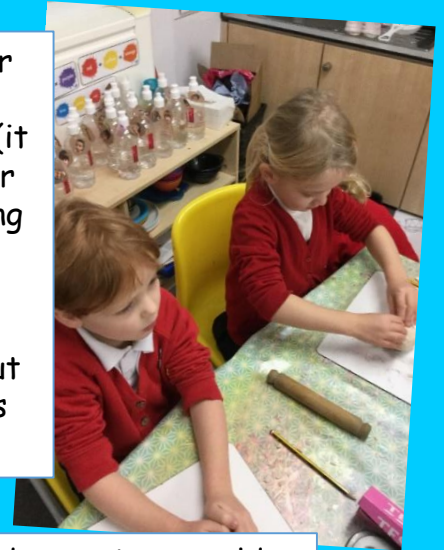

December 2020

Reception researched, designed, made and decorated their own Christmas tree decorations.

First, we looked at pre-existing products - we really enjoyed decorating our school Christmas trees!

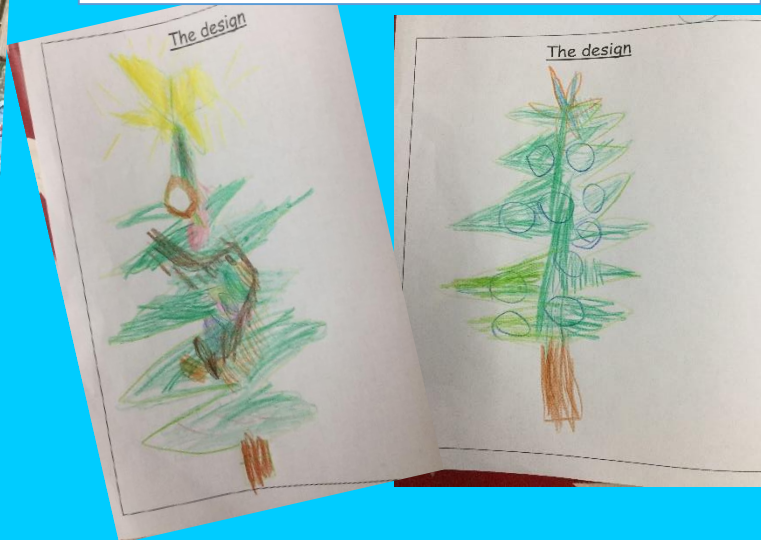

Then, we made our decorations by making salt dough (it is just water, flour and salt) and letting them cook in the oven. We then painted our decorations and put some glitter on as well!

Next, we drew designs of the decorations we wanted to make ourselves.

Finally, we tried to see if our decorations would work and spoke about how we would change them.

"They look liked what I drew"

"My decorations are beautiful"

"I need a bigger hole for my ribbon it was too difficult to thread"
