

Year 4 Geography Areas of volcanic activity

We learnt about why people choose to live in areas of volcanic activity. Millions of people around the world live on or close to volcanoes. We learnt that people make this risky decision due to tourism (which creates jobs), geothermal energy (which helps to power communities) and for the mineral rich soils (which benefits farming).

We were given the task of encouraging people to move to the town of *Volcanius*, where an active volcano forced the previous residents to flee when it last erupted. We had to advertise the benefits of moving to this town.

YOU should move to **Volcanius, Iceland!**

This beautiful town is a perfect place for all! No matter how big your family is, we have beautiful houses for low prices in this small, serene village just for you. There are lots of perfect jobs- you'll be paid generously- and schools with excellent education. The village is next to a volcano called Mount Eruptalot, and I assure you, it *does* not erupt a lot. The volcano erupted last year but the volcano's lava flow usually flows into the sea and unexpectedly it flowed down to our village. It is still being built on, and will be finished soon. Our volcanic soil is very good for what we grow in our fields: oranges, lemon, lime, apples, lettuce, lots of other fruit and veg. These are pictures of our volcanic soil fields:

Volcanius is a lovely town because of the heat of the floor it is warm there is a natural spa and the volcano barely erupts!

A town's folks quote: "It's lovely and warm so much so you can climb a day out of the farm and take lots more."

The people are friendly lots of shops and beautiful restaurants and local supermarkets

Sincerely mayor Caspian

Hello I am mayor of volcanius a small town on the side of a volcano.

Now come on down to volcanius where dreams come true. PS: Never feel cold again.

Volcanius

Some people say it is dangerous to live near a volcano but there wrong I mean imagine how rich you can get when mining. So many worm natural pools of water. If I want you should get a ticket right now to come here.

From Mayor Caspian

Volcanius is not a dangerous town... It is BEAUTIFUL!

Fresh water kind people

I'm the mayor

COME TO VOLCANIUS

Nice warm city full of minerals such as gold, silver, diamond and zinc.

From our **VOLCANO!!** You may be worried but we

always keep track of it with no need for a vaccine or test --**BECAUSE NO COVID**

19!!! And if you care for the environment, we use **GEOTHERMAL ENERGY** to create electricity!!

EVEN THOUGH THE NAME OF THE VOLCANO IS MT ERUPTALOT YOU'LL ENJOY IT A LOT!

Visit **VOLCANIUS ICELAND**

perfect place to live

rich soil for farming

pay less for your energy

mining opportunities

jobs in tourism

geothermal spas

beautiful landscape

Why live anywhere else?

THANKS TO OUR AMAZING VOLCANO WE HAVE VOLCANIC SOIL RICH WITH MINERALS. FOR FARMERS THIS IS THE BEST THING ANY CROP WOULD EVER WANT.

Come to the beautiful Volcanius island

OUR GEOTHERMAL SPAS ARE WORTH COMING FOR. THEY ARE FOUND NEAR OUR LOVED VOLCANO

Our beautiful volcano's view is spectacular

OUR VOLCANO PROVIDES US WITH ELECTRICITY WHICH CAN BE USED TO MAKE ENERGY FOR LIGHTING AND HEATING EXTREMELY CHEAPLY.

Come & Join Us..

YOU CAN FIND GOLD, SILVER, DIAMOND, COPPER, ZINC IN THE DRIED UP LAVA.

THE BEAUTIFUL VIEW AND VOLCANO ON OUR ISLAND ATTRACT TOURISTS WHICH BRINGS MONEY FALLING DOWN AND A LOT OF JOBS.

PIC-COLLAGES

If it does erupt I will set an alarm two hours before it erupts so you have enough time to pack your stuff and get on the **EMERGENCY BOATS.**

It is perfectly safe here because like I said it is starting to be extinct.

It is located in the north of Iceland

The volcano is starting to be extinct so come now and not to late.
