

# Wellbeing Tip of the Week

## Belly Breathing

## Belly breathing

Have you ever noticed how you breathe when you feel relaxed? The next time you first wake up in the morning or just before you fall asleep, try and notice your breathing.

Deep breathing is one of the best ways to lower stress in the body. This is because when you breathe deeply, it sends a message to your brain to calm down and relax, which then signals your body to relax.

Belly breathing is easy to do and very relaxing. Try this basic exercise anytime you need to relax or relieve stress:

1. Sit or lie flat in a comfortable position.
2. Put one hand on your belly just below your ribs and the other hand on your chest.
3. Take a deep breath in through your nose, and let your belly push your hand out. Your chest should not move.
4. Breathe out through pursed lips as if you were whistling. Feel the hand on your belly go in and use it to push all the air out.
5. Do this breathing 3 to 10 times. Take your time with each breath.
6. Notice how you feel at the end of the exercise.
