Reception's Design and Technology Project
December 2021

Reception researched, designed, made and decorated their own Christmas decorations.

First, we looked at pre-existing products (we really enjoyed decorating our school Christmas tree!)

Then, we made our decorations by making salt dough (it is just water, flour and salt) and letting them cook in the oven. We then painted our decorations and put some glitter on as well!

Next, we drew designs of the decorations we wanted to make!

Finally, we tried to see if our decorations would work and spoke about how we would change them.

The design

The design

"The shining paint makes my decorations looks great"

"My decoration hangs on my tree by the string"

"My thread did not go through very easily next time it needs to be bigger"
