

Reception's trip to the CLC

We went to the Camden City Learning Centre where we explored a range of technology. We played with remote control cars, tills and lots of battery-operated toys which is what makes them part of the technology world. In the afternoon, we went onto the iPads and computers to design our very own aquariums on 2create a story, - they looked wonderful! We also explored games on busy things and purple mash before heading back to school on the tube. It was the first time some of us had travelled on the Underground - we learnt about how to stay safe on the tube and we loved it!
