

Each class developed their 'working scientifically' skills with an exciting workshop led by experts from the Francis Crick Institute. May 2022

Year 2 used magnifiers and microscopes to investigate different surfaces and to learn about viruses and other micro-organisms. They learnt the importance of hand washing and good hygiene to reduce the spread of viruses.

Year 1 used their senses to make predictions and then identify a mystery object, observing closely and gathering and recording simple data to answer questions.
