

ECO WEEK YEAR 1

Microgreens 13th June

We thought about where some of the fruit and vegetables we buy is grown and how far it has to travel to get to the UK. The best thing we can do is buy British-grown food or grown our own food. We planted microgreen seeds so we can grow our own salad.

Food Waste Bin

✓	X
mouldy food	paper
peel or skin	liquid
vegetable	wrapper
tea bags	glass
bones	plastic
egg shell	metal
coffee grind	wood
	toys
	tissue
	black bags
	fat, grease and oil

We made a list of things you can and can't put into a food waste bin.

We looked in the food waste bin from our hall after lunch and found things in there that shouldn't have been.

Summer PSHE – June 2022

How can we reduce the amount of food waste we make?

Reduce food waste

- reuse leftover food.
- make other things with it.
- don't put things you won't eat on your plate.
- only buy food you will eat.

We spoke about storing food in the correct place – cupboard, fridge or freezer

We made posters with food waste superheroes whose special powers were to reduce food waste.

We discussed only buying food we will eat, and putting any waste in a food waste bin rather than the rubbish bin.

Food waste workshops - 16th June

We took part in workshops with Veolia and Carbon Trust, thinking about what food waste is, and how we can reduce it.
