

# Great class assembly, Year 6!

Your class performance of 'Happy' was fabulous – it was great to see every single one of you contributing by both playing instruments and singing! It certainly made us all feel happy!

We loved seeing your Andy Warhol-inspired portraits of the Queen, plus your other art work created for the Platinum Jubilee.

You shared lots and lots of your Science learning: we heard all about the heart and the different parts of our blood, you showed us how refraction of light works and explained how we see colours and you told us all about how you created branching tree diagrams to classify leaves. You are turning into super scientists and your stop-motion animation of the human circulatory system was very impressive!

We heard all about your PSHE learning about careers, interviews, CVs and how to challenge gender stereotypes for different types of jobs.
