

Our focus for the week was Single Use Plastic. We learnt about the dangers it poses to the environment and then considered different ways to tackle the problem.

GREENPEACE

Eco Week Year 3

Here we are making some wind turbines to think about renewable energy.

We were responsible for promoting Plastic Free July – a month where people are encouraged to give up one item of single use plastic in favour of more sustainable options.

We were lucky to have some really informative workshops with Geobus and Greenpeace.
