

# Fabulous first assembly of the year, Year 4!

Well done, Year 4, for presenting a fun, fact-filled and confident first class assembly of the school year!

You taught us all about your geography learning about the Equator and the Tropics and your history learning about the different periods known as pre-history. You have been learning lots already!

We loved your Stone Age song – singing is a great way of remembering what you've learnt!

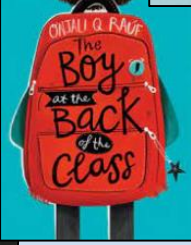

You shared some brilliant art work! You showed us your detailed pencil sketches using a view finder to focus on particular areas of a larger piece. You also shared your cave paintings inspired by the caves at Lascaux, painting on a textured surface you created out of Modroc.

Late at night, Heather was waiting at Cotton Rock. It was freezing, but nothing could stop Heather being thrilled to be there. As Heather thought about her home and her bed, she heard the crack of a twig. After a while, Heather became bored and started to feel sad. Disappointment clouded Heather's mind as she wondered whether she should go home. All of a sudden, Heather heard the roar of an engine and the green glow of something wonderful filled the air.

- CRASH! The spaceship descended onto a bed of leaves and twigs.
- VROOM! The spaceship hovered in mid-air in front of Heather.
- BOOM! The spaceship filled the midnight air with its presence.

We heard some of your wonderful writing inspired by reading 'Lights on Cotton Rock' and your class book, 'The Boy at the Back of the Class'.
