## Self-portraits

### Year 5

### November 2022

Year 5 have taken inspiration for their self-portraits from the American artist Derrick Adams. He is well-known for his paintings, collages, sculptures and videos. His portraits show a variety of skin tones on one person. We divided our faces with straight lines, mixed three different skin tones with acrylic colours, starting with our own skin tone and moving lighter and darker. We worked very accurately trying to keep the straight lines while applying the paint. We then stuck on our own eyes from a photograph we took to give it a personal feature. Our main skills involved accuracy and colour mixing which Year 5 mastered excellently!
