Reception's Design and Technology Project
## December 2022

Reception researched, designed, made and decorated their own Christmas decorations.

First, we looked at pre-existing products (we really enjoyed decorating our classroom Christmas tree!)

Next, we drew designs of the decorations we wanted to make!

Then, we made our decorations by making salt dough (it is just water, flour and salt) and letting them cook in the oven. We then painted our decorations and put some glitter on as well!

The design

Finally, we tried to see if our decorations would work and spoke about how we would change them.

"My decoration has a good function - it works"

"The shining paint makes my decorations looks great"
