

Year 6 D&T project Autumn 2022

3D sewn, hanging Christmas decorations

In D&T this term, Year 6 created 3D, sewn hanging Christmas decorations to sell at the school Christmas Fair.

The project followed the process of research and design; making (including tinkering); making; and evaluating.

For our tinkering stage we practised running and blanket stitch to use for our embroidery and applique to decorate our piece, and blanket stitch to sew the front to the back.

This made our first proto-type. Following this, using our evaluation, we made a new and improved final decoration to sell at the fair. They look amazing and will proudly hang on our Christmas trees this Christmas!
