

Well done, Year 3 – super class assembly!

Thank you for sharing so much of your learning across the curriculum: we heard about your learning about Islam in RE, about the history and significance of North End Tube station, about the features of the South East of England and how you are starting to learn about different types of rocks and soils in Science. You have been very busy!

March 2023

We loved your 'Rocks and Soils' song – this will really help you to remember the properties and used of different types of rocks and soils!

You shared your brilliant Ancient Egyptian masks, explaining how you transferred your 2D designs into a 3D relief and used acrylic paint to decorate them like the artefacts you saw in the British Museum.

The storm was as quick as an eagle,
With amazingly good eyesight,
It went so quick it sliced the trees,
It has black and white feathers,
And howls through the night,
It spreads through the jungle at the speed of light,
Gliding through the creepy, dark night.

We loved hearing your brilliant writing, inspired by your poetry reading, by a short film called 'Taking Flight' and by creating your own model dragons!

Tony looked out of the window desperate for something to do. Finally he walked quickly out of the old, rusty car. As his old, blissful grandpa greeted him, he walked slowly over to an old, dusty cardboard box and sat down. Then something caught his eye! It was an old picture, so he carefully climbed up to get it.
