

# Career Talks- Year 5 and 6

As part of our PSHE learning, it was crucial that we met with experts in the world of work to hear about exciting jobs that may interest us in the future. We were lucky enough to speak to software engineers, construction workers, a barrister, professionals working in HR and in sales as well as speaking with the founder and brains behind RODOCODO which is a coding programme we use to learn coding in school. We learnt about what attracted them to their position, how they got there and what skills and experience we could develop to get us closer to our dream jobs!
