

We loved seeing your electrical houses with hidden electrical circuits designed, made and evaluated in DT.

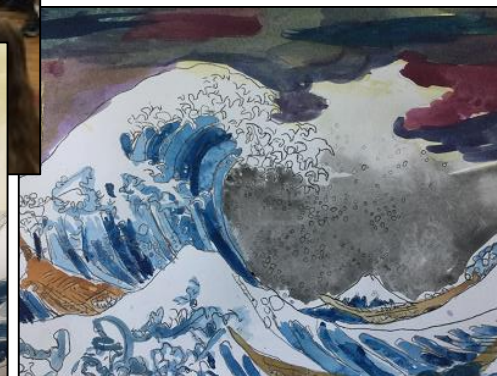

Super assembly, Year 4!

You shared so much learning and in such a clear, confident and entertaining way!

June 2023

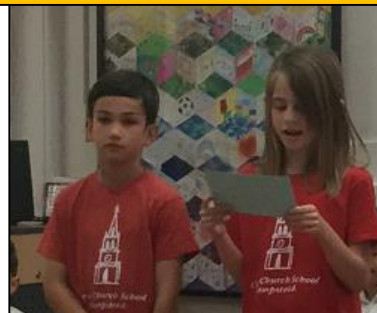

Your 'Great Wave' pictures, inspired by Hokusai's famous art work and created using carbon paper printing and water colours, were spectacular!

We loved how you acted out how the particles behave differently in solids, liquids and gases!

You shared some great writing inspired by reading 'The Lion and Unicorn' by Shirley Hughes and some super animal Haiku poems.

You shared lots of fascinating science learning, including your investigation into how different drinks affect your teeth and how you modelled how the digestive system works – very messily! Your Science songs will help you remember your learning forever!
