

# Super assembly, Year 4! Well done for sharing the first class assembly of this year, Year 4 – you presented all your learning so clearly and professionally!

You explained all about your maths learning on Roman Numerals, your Geography learning on how we divide up the world and your History learning on the different periods in the Stone Age and how historians have found out about them by interpreting archaeological finds.

You shared some brilliant art work: your textured relief cave paintings inspired by the Lascaux Caves and your use of view finders to focus in on small areas of an image or landscape.

We heard some super writing inspired by your class book, *Lights on Cotton Rock*, and including your learning on time adverbials and onomatopoeia.

You explained how your Learning Skills lessons have been giving you lots of good ideas to help you really remember what you are learning – including by singing, such as in your brilliant Stone Age song!
