

YEAR 6'S AUTUMN DT PROJECT!

In DT this term, Year 6 created 3-D sewn, hanging Christmas decorations to sell at the school Christmas Fair.

3-D sewn, hanging Christmas decorations

For the tinkering stage of our project, we practised running and blanket stitch to use for our embroidery and applique to decorate our piece, and blanket stitch to sew the front to the back. We then made our first decoration and evaluated it.

To begin, we researched Christmas decorations for inspiration. We then designed our own Christmas decoration, thinking about the shapes, colours and designs we wanted.

Following this, using our evaluation, we made a new and improved final decoration to sell at the fair. They look amazing and will proudly hang on our Christmas trees this Christmas!

The project followed the process of research and design; making (including tinkering); evaluating, remaking; and evaluating again..
