

Year 4 – CLC Trip

March 2024

Year 4 had great fun on a trip to the CLC. In the morning, we were very busy programming Micro:Bits to perform a range of functions such as flashing different images or playing different sounds. We even created our own Tamagotchi inspired pet! After lunch, we had used the website 'CoSpaces' creating animated 3D worlds that were interactive. We had a great time doing this and were able to create some extremely entertaining animations.
