

Great assembly, Year 4!
Thank you for sharing all your learning with us. You presented your assembly so clearly and we all learnt a lot!

You explained about how you are taking action related to UN Goal 13, Climate Action, by writing to the local MP.

We heard all about your Science learning including the results of your enquiry into the effect of different liquids on tooth enamel.

May 2024

The Snow
The wind
Birds keep chirping
White blanket on the floor
Sun peeking through the big towers
Silence

The Sunny Beach
Waves crashing loudly
The carpet of sand crunching
Clouds as white as snow
Young children playing sweetly
Beneath the burning hot sun

You shared some beautiful syllabic poetry on the theme of nature. You taught us all about syllables, haikus, tankas and cinquains.

We loved your super performance of a song all about the digestive system! You all know all about every stage of what happens to our food as it travels through the body.
