

You explained how you are going to take action by campaigning related to Global Goal 14: Life below water.

Well done, Year 2!
Thank you for a great class assembly!

We heard all about your science enquiry into the effect of exercise on our bodies, your trip to search for minibeasts and pond creatures and how you used microscopes to investigate germs!

We loved your two songs: one song teaching us all about the life cycle of a frog and your brilliant Grandma Rap!

You shared some excellent writing, taking inspiration from Aboriginal dream time stories.
