

Camley Street Natural Park June 2024 - Year 3

As part of our Science learning, Year 3 went to Camley Street Natural Park. First, we went for a walk about to see what animals we might find. Then we went pond dipping and we found lots of different creatures.

After that, we went to see what animals we might be able to identify while digging in the woodland area. We had an identification sheet to help us spot different types of insects.
