

## Year 2 07.10.2024 Natural History Museum

We visited the Natural History Museum. As we entered the main building, we were in awe of the size of it and as we looked up we saw a giant whale!

While we were there, we learnt about minibeasts and took part in a workshop to remind us of last year's learning about animals. We had a great time hunting for insects in the Natural History Museum gardens. Then we got to explore the museum and we loved the dinosaurs!
