

Year 1 went on an trip to St Albans Cathedral. We went on a Maths trail and explored the patterns and shapes inside the Cathedral building.

Year 1's trip to St Albans Cathedral

We created beautiful tile rubbings and had lots of fun using our bodies to measure different objects inside the Cathedral.

We used a balloon and trundle wheel to measure the height of the Cathedral and discovered it is 20 metres tall!

January 2025

Drawing inspiration from the spectacular windows, we created our own stained glass windows and can't wait to display them in our classroom!
