

Year 4's Trip to the CLC February 2025

Year 4 went to the CLC in February to learn about Music Technology. We started by learning about the classic 'Billie Jean' drum beat and had a go at stamping and clapping it. With this knowledge, we went to the computers to try and create this beat on a computer software.

Then, we were able to change this beat and play with different drum rhythms, using the snare, kick drum and hi hat settings. After that, we used the horn section and the bass section to compose more short sections of music that would sound cohesive with our drum beats.

Finally, we spent some time composing a complete piece of music. We chose when we wanted each instrument to play to create a dynamic piece of music.
