

Year 1 used their senses so they could identify different objects. They also thought of adjectives to describe what they perceived using their senses.

Year 2 learnt all about germs and what we can do to try to help stop the spread of them. Then, they looked through microscopes at different things in the classroom

Year 3 learnt about the function of the skeleton and different muscles.

Francis Crick Science Workshops May 2025

On 1st May, Years 1, 2, 3, 4 and 6 took part in science workshops linked to our topics with amazing scientists from the Francis Crick Institute.

Year 4 focused on sound and learnt why having two ears are better than one! They used homemade devices to listen to the different sounds objects around the classroom made when they were tapped.

Year 6 looked at how light travels in straight lines and reflects off surfaces.
