

Year 1's trip to Camley Street Natural Park

Tuesday 10th June

We had a fantastic time on our Science trip to Camley Street Nature Park in Kings Cross. We really enjoyed looking for signs of different birds around the park. We listened to bird song and learnt the names of some common UK birds including blackbirds, robins and wrens. We even saw a tree that had been pecked by a woodpecker!

We went on a mini-beast hunt and found woodlice, slugs, centipedes, caterpillars and more! Our favourite activity was pond-dipping during which we managed to identify a range of lifeforms including water boatmen, leeches, pond skaters and freshwater shrimps!
