

To help us think about Camden clean air day, we enjoyed an interesting assembly all about indoor pollutants. Some children, supported by our expert scientists, used air quality sensors in a converted dolls house to test a range of indoor air pollutants.

They controlled a live camera feed, which captured all the action and displayed it on the big screen. This showed how cosmetics, cleaning products and wood burning impacts indoor air quality, and how the actions we can take can reduce their concentrations.

**CLEAN AIR**  
**FOR CAMDEN**  
**SCHOOLS**

After school, volunteers from 'Think and Do' hosted a stall to raise awareness about air pollution. They brought quizzes and prizes, and kites to take home!

CREW – our Christ Church Eco Warriors - helped out too!
