

Year 1 Heath trip – 23/09/2025

In Geography, we have been learning about the seasons in the UK and seasonal changes. On our trip to the Heath, we looked for signs of autumn including trees losing their leaves and leaves turning red, yellow, orange and brown.

We collected autumn leaves and made our own 'autumn sticks' by threading the leaves on to our sticks. We talked about the different shaped leaves and the different trees they might come from.

We also found lots of acorns and conkers! We learnt that acorns come from oak trees and read a story called 'Little Acorns'.
