

We visited the Florence Nightingale Museum which was a fantastic way to bring our history learning about Florence to life. 'Florence' showed us around the museum and we role-played, dressed up and looked at artefacts that helped teach us even more about Florence's life.

We learnt about how Florence's **legacy** lives on. We understand that Florence is **significant** because she made changes to hospitals which was something new. 'Florence' showed us how St Thomas's Hospital is still **inspired** by Florence's legacy and her contributions to medicine.
