

Fantastic assembly, Year 4! Thank you for presenting all your learning from this term so far in such a professional and engaging way!

You explained all of your Geography learning on how we divide up the world and your History learning on the different periods in the Stone Age and how historians have found out about them by interpreting archaeological finds.

We loved your song all about the Stone Age and your cave paintings on a textured surface were fantastic!

As Heather silently sat still on Cotton Rock, shining her bright torch, she was confident someone would come and take her to the magical stars. Every minute, she knew nothing could spoil this moment. She had waited her whole little life for this. She heard the wind whispering to her quietly and saw the stars dancing like diamonds in the ocean of darkness above her. She was becoming impatient, but still felt hopeful. Within seconds, she saw a very bright star moving quickly, coming towards her. Was it what she thought it might be? Would her dream finally be fulfilled? But as it came closer, she realised it was just a shooting star. Almost out of hope, she kept listening, the sounds of owls flapping their wings in the distance.

You also shared your amazing emotion colour wheels with us!

November 2025

We heard some super writing inspired by your class book, Lights on Cotton Rock, and loved your explanation of onomatopoeia!
