

# Reception's CAP project-Autumn 2025

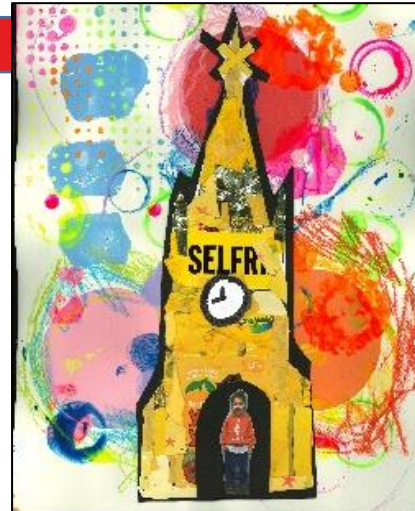

## Our Inspiration was Beatriz Milhazes

She is a contemporary Brazilian Artist who is inspired by the colours and shapes of the landscape in Brazil.

- She uses a mixture of collage and printing to create colourful pictures of shapes (mainly spots) and flowers.
- She uses acetate to paint onto before printing the designs on to the paper!

## Linking to the theme of Belonging on the Happiness Project

We learnt that being part of groups and different communities can make us feel happy and part of something bigger. We spoke about the different groups we belonged to including being part of the Christ Church Primary School community. We collaged the school logo using a range of materials including packaging inspired by Beatriz Milhazes. Lastly we added photos of us into the collage to represent us being apart of our school community.

We made our own colourful backgrounds but did not paint onto the paper, instead we painted onto laminated card and then printed the patterns and shapes onto the paper. Most of our backgrounds are made up of printing with some collage added into it!

We used really bright colours and different stencils and objects to print all sorts of shapes onto our backgrounds.
