

Year 3 - CLC Trip

Thursday 15th January

Year 3 went to the Camden Learning Centre for a programming workshop using Lego Essentials. First, we chose one of several funfair attractions to build. Once finished, we programmed our attractions to make them spin, light up or play a sound. We had to be very creative and resilient to solve the problems we faced along the way, but in the end, we created some fantastic products and had a great time!
