

Year 5 visited the Google UK offices in King's Cross! We had a tour around the office and even went up to the roof garden, which boasts a view of London's major landmarks.

When we arrived, we listened to a presentation about all Google. We were amazed to learn that there are on average 8.5 billion Google searches a day!

We learnt all about the amazing assistive technology that Google have developed to support those with disabilities, particularly those with impaired vision. We used a ball bearing watch, a voice assisted light and a steady spoon. We even read from the braille version of Harry Potter and the Philosopher's Stone!

# Year 5 Google UK Offices

We got to try some of the video games Google have adapted to make them more accessible. We played a driving game by moving our eyes and tried FIFA with a specially designed remote controller.

These simulation spectacles give the wearer a sense of what it would be like to have different visual impairments.
