

Fabulous assembly, Year 6!

What a great assembly, Year 6, sharing such a wide range of learning and thinking in such a confident and professional way.

You showed us your fantastic nightlights which you designed and made in DT; we were very impressed with how you had programmed them using the Crumble coding kits!

June 2026

Your pop art inspired artworks were amazing and it was great to hear an impressive preview of one of your production songs!

You also told us so much about all of the science you have been doing, including your learning about how we see, the different symbols for electrical components and how the circulatory system works!
