

Camden Careers Event – Year 4 and Year 5

23rd September 2026

Year 4 and 5 took part in a careers even held by Camden. We learnt all about different careers in STEAM.

We spoke to a neuroscientist about her job and how different parts of our brains are responsible for different things.

We participated in three different activities while at the Royal Veterinary College.

We were able to speak to lots of people who work in different STEAM fields.

We looked around the anatomy museum at all the different specimens on show. We even got to pretend we were vets, and bandaged up some sick 'animals'!
